1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-25, drawn to apparatus and method of processing multiple reaction mixtures in parallel, classified in class 422, subclass 130.
 - II. Claims 26-31, drawn to a cannula, classified in class 604, subclass 27.
 - III. Claim 32, drawn to a vessel or vial for placement in a plurality of wells, classified in class 422, subclass 102.
 - IV. Claims 33-43, drawn to a method of preparing and delivering a slurry, classified in class 34, subclass 347.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II or III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombinations are only generally claimed. The subcombination has separate utility such as part of a syringe for the cannula and as a stand alone bottle or container for the vessel.
3. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each invention has separate utility such as explained in the above paragraph. See MPEP § 806.05(d).
4. Inventions IV and I, II or III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process does not require the specifics of the apparatus for its practice.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, different searches are required for each and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. During a telephone conversation with Brian P. Klein on March 4, 2004 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-25. Affirmation of this election must be made by applicant in replying to this Office action. Claims 26-43 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brian P. Klein on March 4, 2004.

The application has been amended as follows:

Claims 26-43 have been canceled

9. The following is an examiner's statement of reasons for allowance: the art of record fails to teach or fairly suggest the apparatus or methods found in claims 1-25.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arlen Soderquist whose telephone number is (571) 272-1265. The examiner can normally be reached on M-Th and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on (571) 272-1267. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
